

Identity and Access Management Practice

Locuz has built a strong practice with field tested methodologies based on standards and proven frameworks, for providing Identity and Access Management solutions aligning with the business requirements of different industry verticals.

Our comprehensive IAM services effectively address the challenges of today's fragmented identity landscape, using our competencies in the varied identity management tools; to build solutions that offer seamless access to resources, maintain user information integrity and confidentiality.

Identity Access Management

With the growth of e-business, organizations are wrestling with the challenge of managing secure access to information and applications scattered across a wide range of internal and external computing systems. In addition, they have to provide access to a growing number of users, both inside and outside the organization, without diminishing security or exposing sensitive information. The management of multiple versions of user identities across multiple applications makes the task even more daunting.

Locuz's comprehensive Identity and Access Management services effectively address the challenges of today's fragmented identity landscape, using our competencies in the varied identity management tools; to build solutions that offer seamless access to resources, maintain user information integrity and confidentiality.

"HDFC Standard Life has been growing at a phenomenal pace. We added over 8000 employees in 1 year, a big portion of which is in the form of our mobile sales force. There was need to securely manage these identities (users) which were spread across 100 locations. Locuz worked with us closely, and armed with a deep understanding of our needs & business processes, implemented an Identity Management solution which automatically & securely provisions user accounts based on their role. The IDM solution also helped us to carry out centralized management and meet compliance needs.

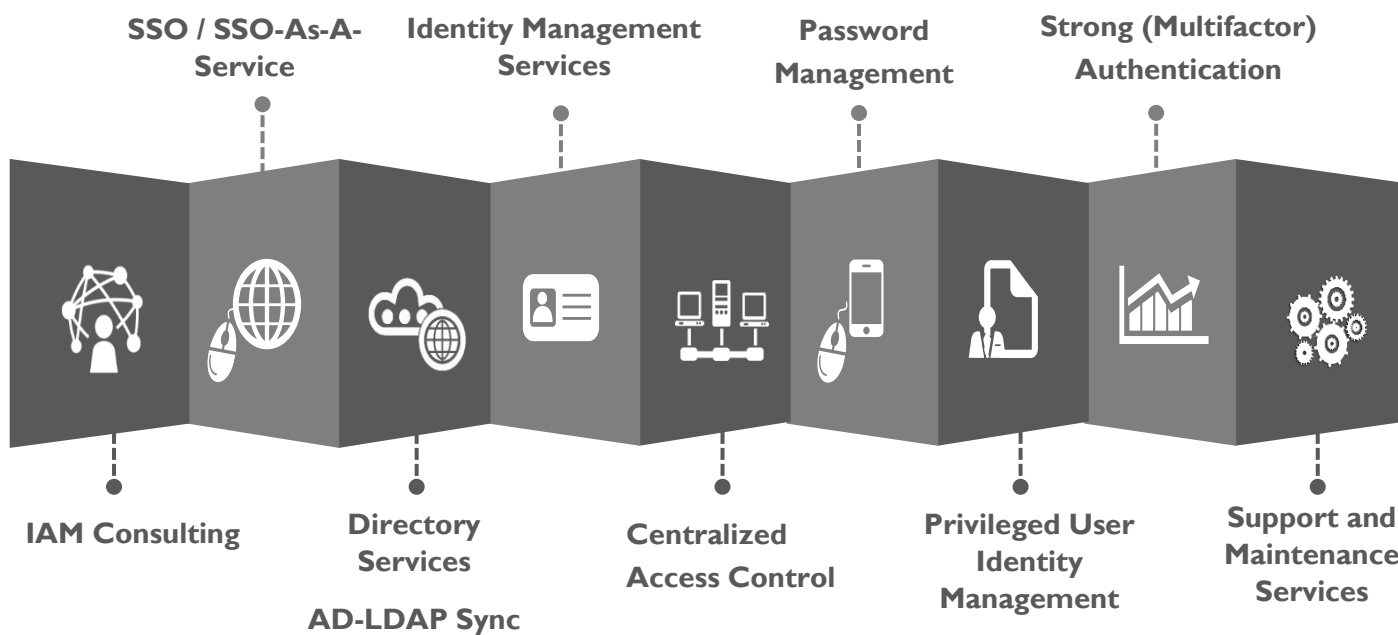

We are very satisfied with the work done by Locuz. The team did well in applying their technology understanding to our business needs. Today we are able to make new employees productive much faster and the operational and helpdesk calls have also reduced dramatically"

Sunil Rawlani (CIO, HDFC Life)

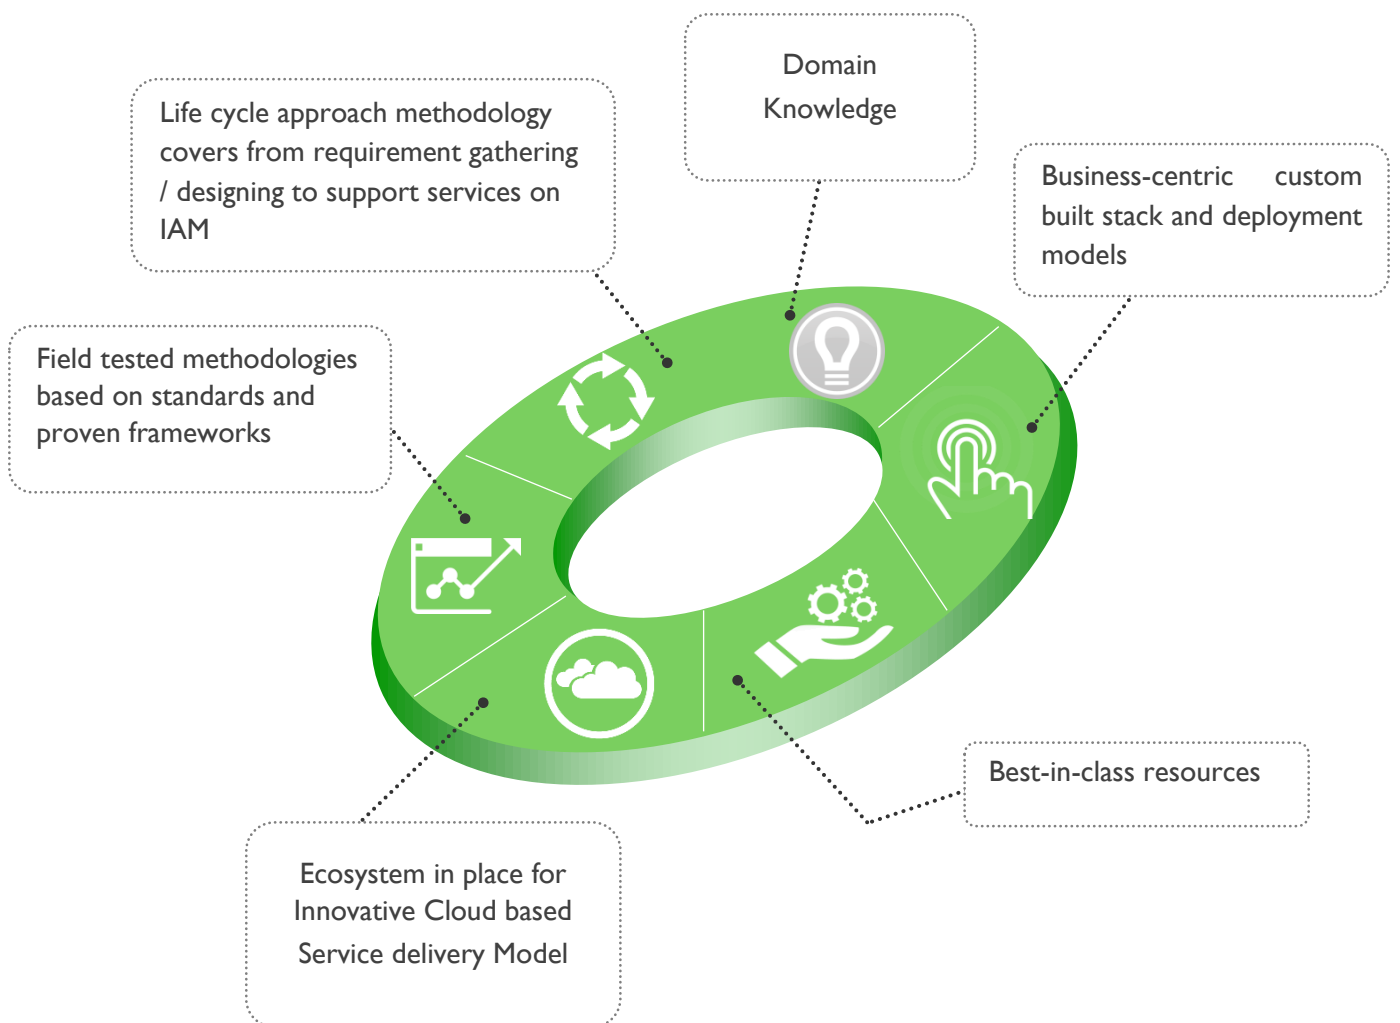

Service Offerings

Our product expertise in the identity management space includes certified skills in CA, RSA and ForgeRock. Engaging with Locuz for IAM is a value proposition because we offer end-to-end services from control objective setting to monitoring, to governance and risk management.
