

Security Practice

We provide a layered security approach that addresses the infrastructure as a whole.

Our security life cycle services comprises of people, processes and technologies that provide secure access to your business applications, from anywhere and from any device.

Today's security challenges require a fresh look at connectivity and its related security from a fundamental, architectural, perspective.

Dynamic Threat Environment

- Internal and external threat environment not improving
- Attacks becoming more targeted and financially motivated
- Attacks becoming more sophisticated, targeting applications as well as networks
- Organized criminal gangs taking over from teenage hackers and "script kiddies"

Regulations / Compliance

- Base II, Sarbanes-Oxley, HIPAA, SEC, PCI DSS etc...
- Shareholder Value
- Brand and Reputation

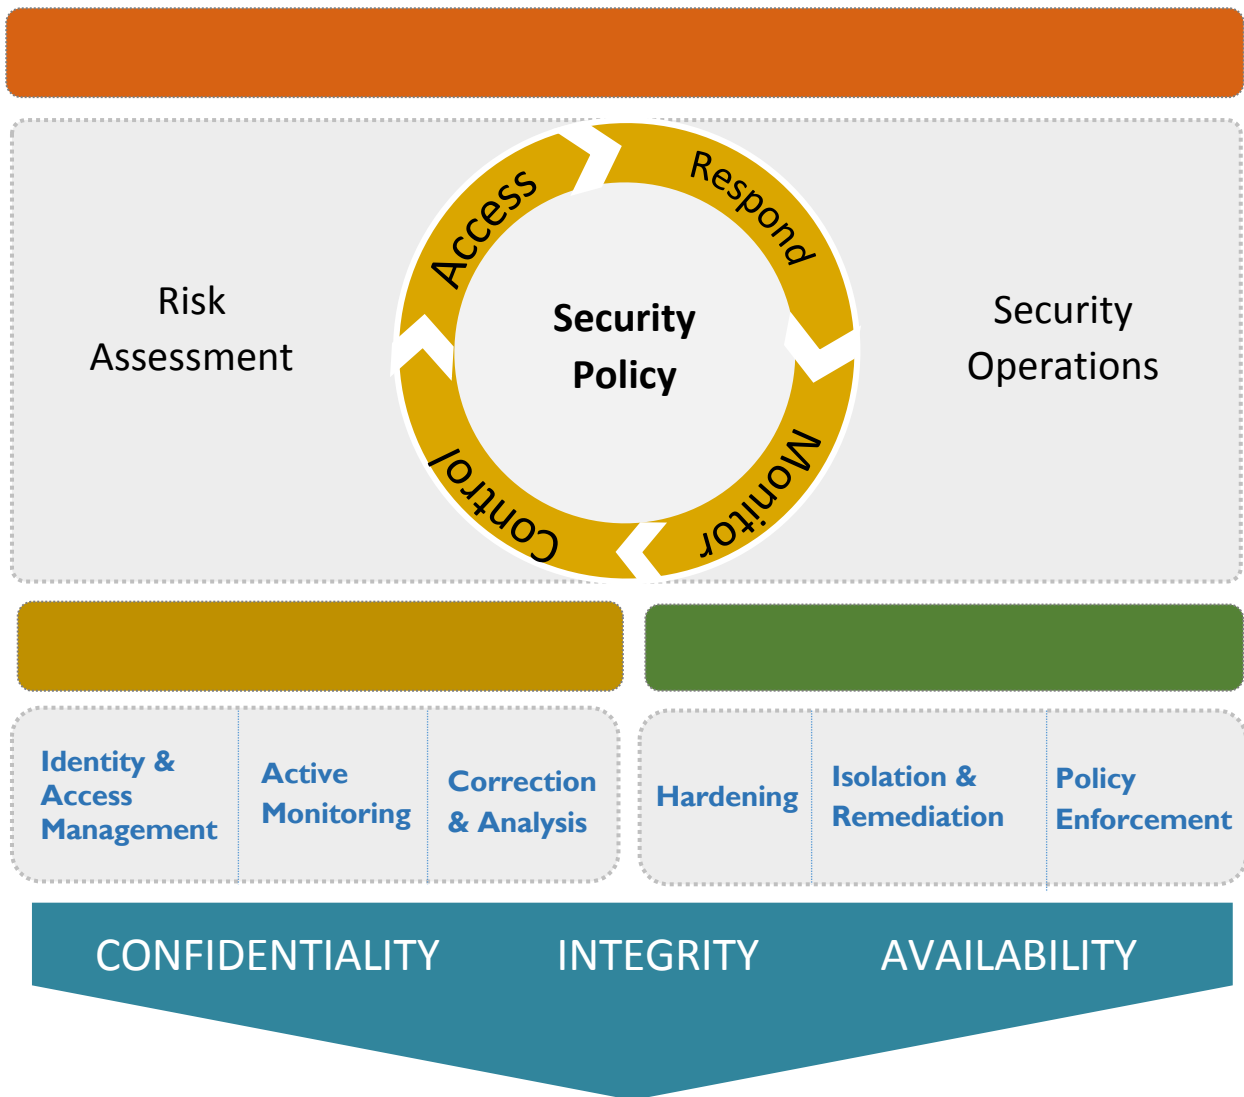

Cost and Efficiency

- Security management as operational cost, subject to same rigor as rest of IT
- Risk based approach essential to justify security investment
- Integration of security management across enterprise to reduce costs and optimize effectiveness

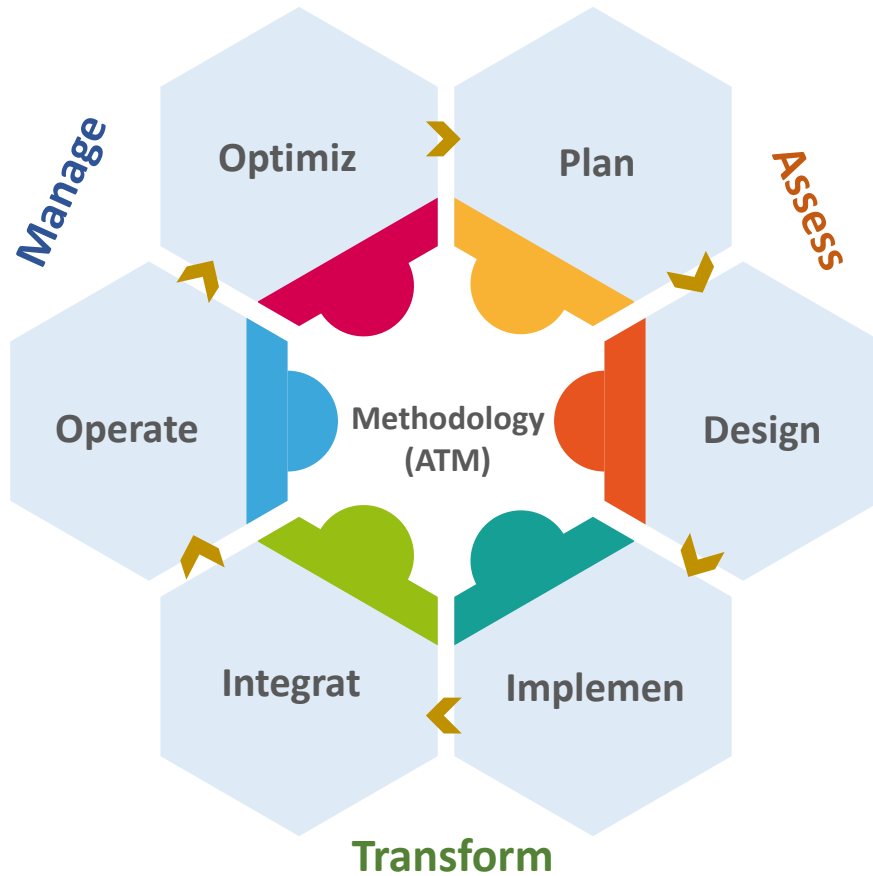

We provide a layered security approach that addresses the infrastructure as a whole and deploying multiple layers of protection reduces the risks of intrusions. Our security services comprises of processes and technologies that provide secure access to your business applications and new endpoints. A controlled exercise performed by security experts, conducting Information Security and Network Security Assessments and Audits we can ensure your organization is immune to various threats and vulnerabilities by taking various standards and best practices as benchmarks.

Security Services- Framework

Consulting Methodology

Assess

Prepare & Plan for a robust security solution architecture framework and deployment. Build a design which is scalable, adaptable and easy-to-upgrade

Transform

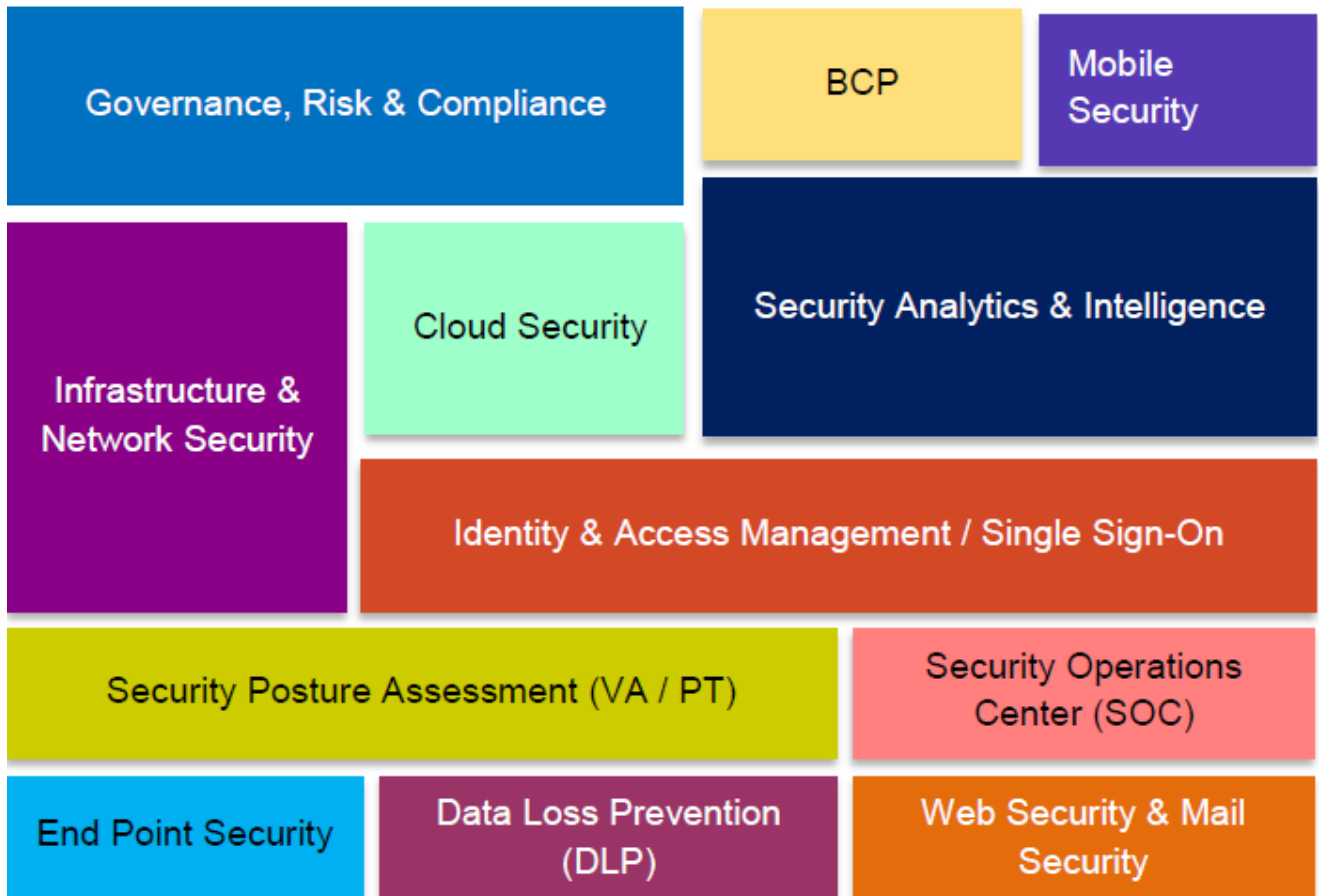

Deploy the solution with meticulous execution and integrate it completely into the network infrastructure and application environment

Manage

Deploy the solution with meticulous execution and integrate it completely into the network infrastructure and application environment

Security Services Portfolio

..... Win Stories

IdM and SSO implementation for across 20000 users spread across 100+ locations. Among the first private Insurance company deployments in India. The implementation was awarded by the CIO100 forum for the Business Advantages it delivered to HDFC Life.

Built an Open Source SSO infrastructure for 3,000 users spread over 10 applications with Strong 2-layer Authentication for Critical Banking Applications. Managed the infrastructure 24x7 for last 2 years.

Value Proposition

Life cycle Approach - Security consulting/audit, deployment & managed services

Domain Knowledge, Focus on Cloud Security & Mobility

Field tested methodologies based on standards and proven frameworks

CERT-In Empaneled Auditor

Best-in-class resources

Security Operation Center (SOC)

..... Strategic Technology Alliance

About Locuz

Locuz is an IT Infrastructure Solutions and Services company focused on helping enterprises transform their businesses thru innovative and optimal use of technology. Our strong team of specialists, help address the challenge of deploying & managing complex IT Infrastructure in the face of rapid technological change.

Apart from providing a wide range of advisory, implementation & managed IT services, Locuz has built innovative platforms in the area of Hybrid Cloud Orchestration, High Performance Computing & Software Asset Analytics. These products have been successfully deployed in leading enterprises and we are helping customers extract greater Rol from their IT Infrastructure assets & investments.
