

Assuring Your Peace of Mind with AWS Managed Services

We understand that customers are increasingly demanding the flexibility that best serves their requirements. Cloud management demands robust processes and 24x7 attention to ensure consistent application and infrastructure performance. We offer a broad portfolio of services required to manage complex & critical Hybrid IT/Cloud infrastructure environments more efficiently, ensuring that it fits the requirements of the business and has the flexibility to evolve as your business needs change.

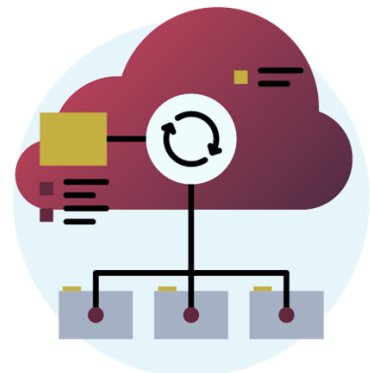

aws partner network
Advanced Consulting Partner

We provide ongoing management of your AWS infrastructure so you can focus on your applications. By implementing best practices to maintain your infrastructure, we help to reduce your operational overhead and risk.

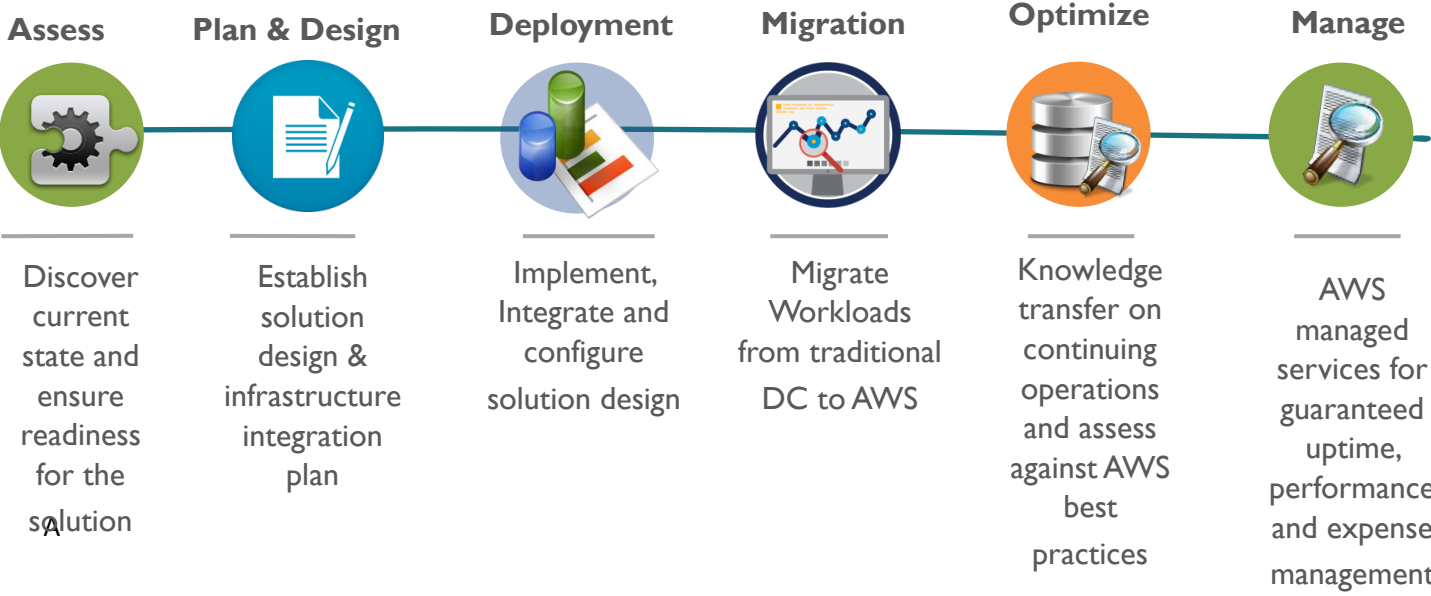

We enable our customers in their AWS journey, provide them with complete Lifecycle Services which include: Architecting & Advisory Services, AWS Readiness Assessment Services, Proof of Concepts, Migration Services, and Sustenance & Expense Management services. Our customers that have their workloads migrated on AWS, are assured of 24x7 operations and sustenance support by a team of certified engineers who have a deep understanding of native AWS & third party Automation tools from our Cloud NOC and every single contract is bagged by SLA. Our teams also provide continuous analysis to optimize performance, to provide secure access, & to economize consumption on AWS.

We automate common activities such as change requests, monitoring, patch management, security, and backup services, and support your infrastructure. Our rigor and controls help to enforce your corporate and security infrastructure policies, and enables you to develop solutions and applications using your preferred development approach. We improve agility, reduces cost, and unburden you from infrastructure operations so you can direct resources toward differentiating your business.

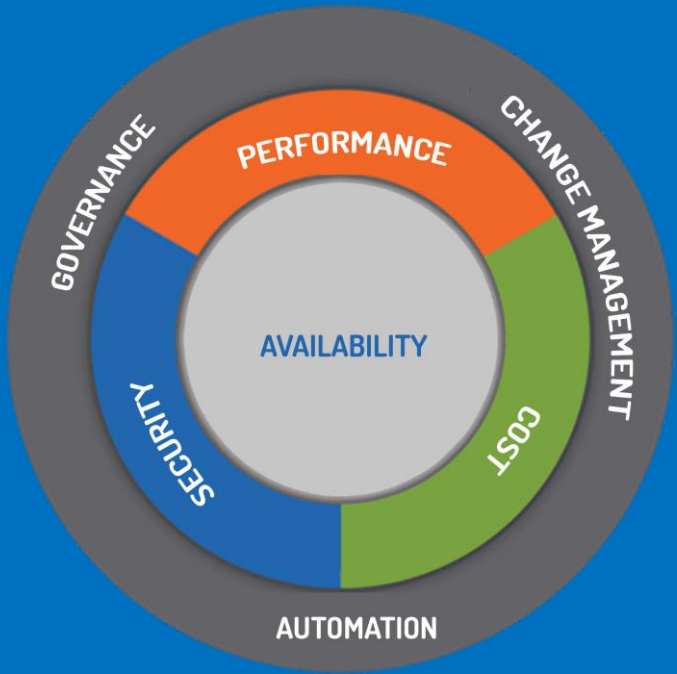

Through 24/7 Remote Infrastructure Management services (RIM) delivered from our cloud NOC, you can tackle bottlenecks at any level in your Hybrid IT/Cloud infrastructure and assess the performance before introducing new solutions or migrating to new platforms. You can gain the complete visibility of your cloud resources to track, manage and optimize the infrastructure, so they consistently deliver the highest levels of business service quality. The dashboards and reports can be offered via a secure, multi-tenant Web portal, enabling both enterprises and service providers to efficiently deliver this information to internal or external audiences.

AWS Managed Services-Engagement Approach

Locuz Managed Services Advantage

Customer Win Story: Helped build a One Click Emergency Notifier to “Call an Ambulance” at your finger-tips and save a life! It’s an App based Actionable emergency tracker service (Micro services based Architecture) built on a Robust, Optimized & Secure AWS Infrastructure which is managed 24/7.
