

Securing You in your Cloud Journey

Despite years of cloud maturity and examples of highly sensitive and regulated workloads, security remains one of the top reasons companies don't move specific workloads to the cloud, especially in highly regulated industries. We simplify how you connect, shield, and utilize cloud in a multicloud world by offering cohesive solutions with cloud providers be it AWS, Azure, Oracle or others. We ensure to give you the cloud security that makes your business agile and strips it of all complexity.

Our Security Credentials

A Secure Cloud with Locuz

Cloud Security & Governance

Service Assurance

- ▶ Extensive & proven Cloud skills
- ▶ Security baked in Risk Mitigation
- ▶ Unified Dashboard with SLA Driven Cloud Models
- ▶ Global Cloud SOC

Cloud Managed Security Services

Program Management and Governance

Technology Management

Cloud Security Monitoring

- Real-time monitoring
- Deep visibility in to SaaS
- Alert analysis and triage
- Detection and Response
- Network, Endpoint, Cloud activity monitoring
- Cloud Infra and SaaS Apps
- Identity and Access Monitoring
- Compliance monitoring
- Anomaly Detection and Reporting
- Hosted Apps, DB Security monitoring
- User Behavior and Access monitoring

Cloud Incident Response

- Incident Investigation
- Active guidance on containment, eradication and remediation
- Malware analysis
- Investigation & Triage
- Thorough technical investigation to containment and recovery
- Gain visibility into the full incident, lock down credentials, and limit access
- Prevent Cloud Breaches
- Static and dynamic malware analysis
- Malware reverse engineering
- Demonstrate compliance

Cloud Threat Intelligence

- Tactical Intelligence
- Strategic Intelligence
- Threat feed integration (included in monitoring tools)
- Tactical support to SM and IR
- Harness advanced analytics to profile users and detect behaviour
- Industry and client tailored subscription service
- Industry threat briefing
- Validate and prioritize security countermeasures
- Threat profile development and trending analysis

Trusted Alliances

Case Reference: For a global multinational conglomerate

Solution: One of India's largest conglomerate group has chosen Locuz to provide Cloud Governance consulting services. The scope includes; Governance model for Cloud Consumption, IT workload categorization, App architecture for public clouds, recommendation on policy compliance, Security & risk compliance, workload migration, & reverse migration strategy Automation & workflow.

Solution Advantage: Helped the Group Companies to take advantage of a central landing zone with enterprise cloud service catalogue published within their compliance and policy framework.
